* This model was designed for Papercraft and may differ from the original in some respects.

■ Assembly Instructions : Six A4 sheets (No. 1 to No. 6)

* Build the model by carefully reading the Assembly Instructions , in the parts sheet page order.

*Hint: Trace along the folds with a ruler and an exhausted pen (no ink) to get a sharper, easier fold.

Assembly Instructions

Mountain fold(dotted line)
Make a mountain fold.

Valley fold(dashed and dotted line)
Make a valley fold.

Scissors line(solid line)
Cut along the line.

Cut in line(solid line)
Cut along the line.

The glue spot(colored dot) shows where to apply the glue.

● Glue spot(Red dot)

Glue parts with the same number together.

● Glue spot(Green dot)

Glue within the same part.

● Glue spot(Blue dot)

Glue to the rear of the other part.

Tools and materials

Scissors, set square, glue(We recommend stick glue), pencil, used ballpoint pen, toothpicks, tweezers, (useful for handling small parts)

Assembly tip

Before gluing, crease the paper along mountain fold and valley fold lines and make sure rounded sections are nice and stiff.

Caution

Glue, scissors and other tools may be dangerous to young children so be sure to keep them out of the reach of young children.

Before starting assembly:

Writing the number of each section on its back side before cutting out the sections is highly recommended. (* This way, you can be sure which section is which even after cutting out the sections.)

The parts used will vary somewhat, depending on whether the completed vessel will be modeled to depict a ship facing wind from the left (with the bow pointed to the right) or from the right (with the bow pointed to the left). First decide where you want to display the completed vessel, then decide whether the bow should point to the left or right.

Bow pointed to the right (A - standard parts)

Bow pointed to the left (B - optional parts)

→ Indicates where sections should be glued together.

→ Indicates where to insert sections. Do not glue the sections together.

Indicates sections that should be glued first, then cut out.

Indicates sections that should be folded once, then unfolded.

1

After folding the part once and gluing the two folds together, cut out from the yellow area.

Glue part 2 together in the same way.

Canon

Parts 64-73

Fold once and glue the folds together, then give the sails a bulging appearance. If you plan to have the bow face to the right, curl the sails so that surface A will bulge out. If the bow will face to the left, curl the sails so that surface B will bulge out.

For parts 74, choose A parts (standard parts) or B parts (optional parts) depending on the direction in which the bow will point.

Parts 43-53

After folding parts 76 - 92 (the square sails) in two and gluing them.

After curling these from top to bottom as shown in the illustration, make them curl from the center to the outside, to make it appear as if they are catching the wind.

Parts 76-86

Parts 87-92

Glue the rear sides of these parts together.

Ships of the world : Cutty Sark

- Cutty Sark Built in 1869: 963 tons: 3 masts: Full-rigged sailing ship: Total length 85.4m: UK

This is a tea-clipper built by Scot and Linton Co. of England in 1869. The Cutty Sark is the only extant tea-clipper. A tea clipper means a high speed sailing ship that transported tea from China to Europe, and all ships competed the transportation speed. The Cutty Sark was at its full blast to crown the end of the era of sailing ships with perfection in those days, but as the Suez Canal was completed and steamboats have emerged, the change of times forced tea clippers to retire. The Cutty Sark was sold to Portugal at one time, but returned to England in 1922, and preserved and exhibited along the Thames since 1954. It was burnt down by fire during the restoration work on decrepitude caused by long open-air exhibition, but since most of the parts had been retained in other locations, the restoration work is still in progress today.

* This model was designed for Papercraft and may differ from the original in some respects.

■ Parts list (pattern) : Fourteen A4 sheets (No. 1 to No. 14)

■ No. of Parts : 128 (Including five optional parts)

* Build the model by carefully reading the Assembly Instructions, in the parts sheet page order.
